NEW 119 Gallon Modular Fuel System

Refueling can be difficult on the job site, especially when your heaters are 15 stories above the ground. Frost Fighter now has a solution for you- The 119 USG Modular Fuel System. One of the most versatile solutions out there- you can quickly fit any of our IDF350, IDF500, IDH400QR or IDH500QR's into it. Using our easy slide in system you can quickly swap heaters in and out, allowing you to supply the right heat for your customer's job site. The

Modular Fuel System has a built-in steel 120% secondary containment system approved to UL standards, and a 4 point lifting bale that also allows you to stack 2 systems together for easy storage while saving valuable floor space. Built-in fork pockets are standard, allowing easy movement and placement of the system. The system is available to purchase already installed on our units, or by itself.
